

Whole House Water Filtration System

Pure Water
for Every Tap.
High-Flow Filtration
for the Entire Home.

Designed to deliver clean and reliable water to every corner of your home, our Whole House Filtration System protects plumbing, improves water quality, and supports healthier daily living.

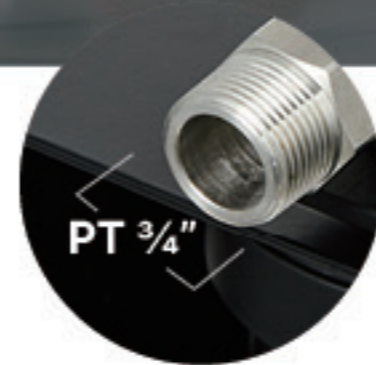

SEONDO

Whole House Water Filtration System

Tap water often contains chlorine and sediment, which can affect the taste, odor, and overall quality of the water used throughout your home.

A Whole House Filter, installed at the Point of Entry (POE), ensures cleaner and more reliable water for every tap in your household.

Our Whole House Water filtration System is designed to maintain strong flow rates while effectively reducing impurities, making it suitable for both residential and light commercial applications.

Connection Area Close-up

2-Housing, 3-Stage Filtration System

Compact Design. Complete Whole-House Protection.

Two housings deliver three stages of filtration by integrating carbon filtration and scale inhibition into one advanced cartridge.

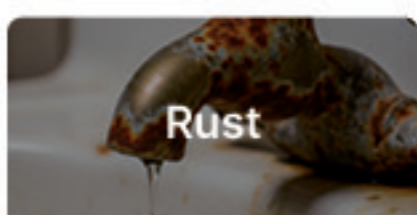

PP Sediment Filter (up to 100,000 gal)

Primary protection for your entire system

- Removes rust, sand, dirt, and sediment
- Filters particles down to 5 microns
- Protects plumbing and downstream filters

Sand

Rust

Dirt

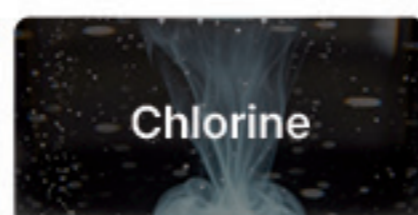

Large particles

Coconut Shell Carbon Filter (up to 100,000 gal)

Improves taste, odor, and overall water quality

- Reduces chlorine, taste & odor
- Helps reduce VOCs and organic compounds
- Enhances water quality for daily use

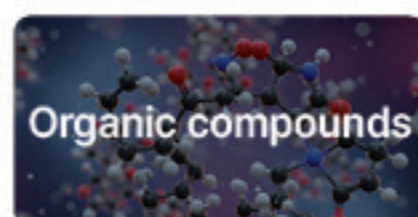

Chlorine

Taste&odor

Heavy metals

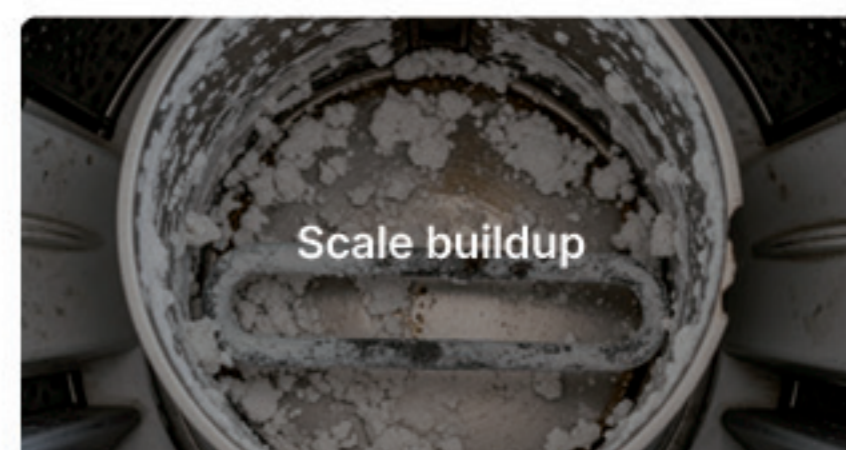

Organic compounds

Anti-Scale Filter

Prevents scale buildup and protects appliances

- Inhibits calcium & magnesium scale formation
- Protects boilers, heaters, and machines
- Extends appliance lifespan

Scale buildup

* The sediment filter and carbon filter are manufactured using NSF-certified materials to ensure reliable quality, safety, and performance.

* This system does not soften water or reduce TDS. It prevents scale buildup without removing calcium or magnesium.

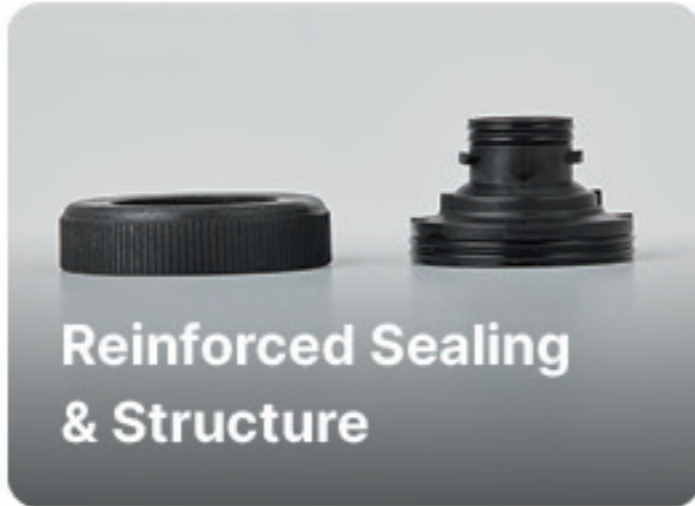

Features

When water pressure drops or the recommended service cycle is reached, timely filter replacement ensures optimal performance and system protection.

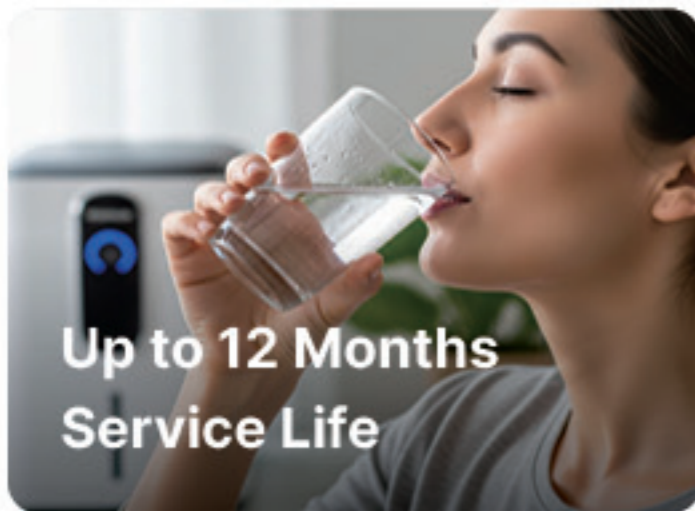

Stainless Steel Pressure Gauges

Real-time pressure monitoring helps users easily check system condition and filter status.

Dual-Lid Design with Double O-Ring Sealing

The dual-lid structure combined with double O-ring sealing provides enhanced pressure resistance, superior leak prevention, and long-term structural stability.

30" Extra-Long Filter Design

Designed with a 30-inch extra-long filter cartridge and high-capacity filtration media to deliver more filtration volume, stable high-flow performance, and long-lasting filtration for up to 12 months.

Actual service life may vary depending on water conditions and household water consumption.

Easy to Use. Easy to Handle.

**No complicated tools. No complicated process.
Designed to save your time.**

Tool-free design and modular structure make installation, replacement, and handling easier than ever.

Tool-Free Filter Replacement

**No wrench. No extra tools.
Just a quarter turn by hand.**

The quarter-turn quick-lock housing design allows users to open and lock the filter housing easily by hand, enabling fast and simple filter replacement without any tools.

Slim & Lightweight Design

**Easy to grip.
Easy to assemble.**

The slim and lightweight design allows users to handle, install, and assemble the system comfortably by hand.

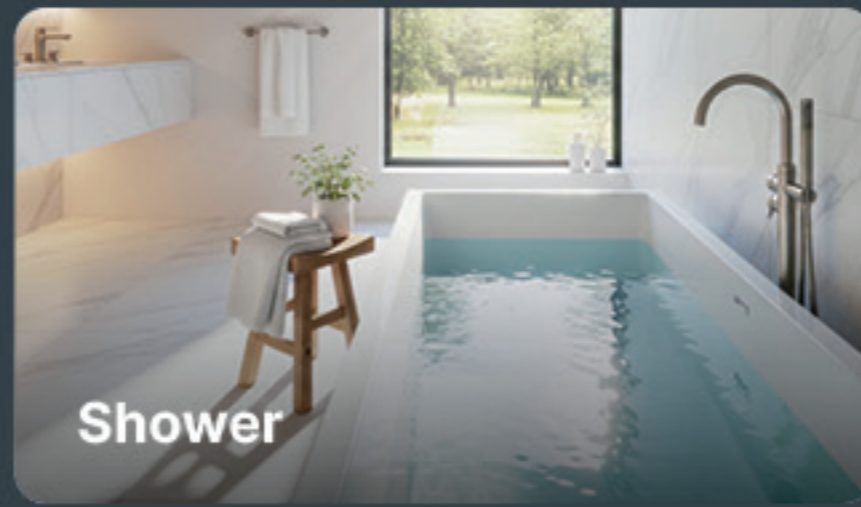

Easy Installation with Push-Fit Connectors

**Quick connection.
No tools required.**

The red push-fit connectors allow fast and secure pipe connection without tools, making installation simple and reducing on-site work time.

Clean Water for Every Part of Your Home

Protection for Your Home & Family

Water Quality

- **Before** Chlorine smell & unpleasant taste
- **After** Pure, clean-tasting water

Plumbing & Appliances

- **Before** Scale buildup, clogging & Mineral deposits
- **After** Clean pipes & protected appliances

Shower Experience

- **Before** Chlorine, fine particles & residue
- **After** Comfortable, refreshing showers
